Go to “Preferences” in the Main Menu and select “Cloud Services”. You will see the Autodesk Cloud services page. You will need to authenticate to your Autodesk account and enter your password. If you don’t have an Autodesk account or if you have an account but you have not used the services before, you will need to create a new user. Once you have been authenticated and have successfully logged in to the Autodesk services, the “Autodesk Cloud Service” will be shown in the main screen. You will need to click on “Download” and then “Download as ZIP” to download the required file. Once you have downloaded the ZIP file, unzip the files you need and move them to the drive you installed the program on. You can now open the program and enter the activation key. As soon as you click on “Activate”, it will install the software and activate it automatically.
