AutoCAD [Mac/Win]

AutoCAD (left) and Microstation (right) – typical mainframe and minicomputer CAD software applications AutoCAD went through several significant revisions over the following three decades, until version 2004 was released as AutoCAD 2004. Since then, the software has been on an unbroken series of releases, with yearly releases (e.g., AutoCAD 2013) and revisions (e.g., AutoCAD R2014) occurring in even numbered years. AutoCAD 2018 is the latest release. Today, the AutoCAD product line includes AutoCAD LT (a "thin" client app for workstations or mobile devices that runs on Microsoft Windows and macOS), AutoCAD Professional, AutoCAD LT Standard, AutoCAD LT Plus, and AutoCAD LT Enterprise. AutoCAD LT Released in October 2010, AutoCAD LT is a thin client (software running in the cloud) that allows AutoCAD users to access AutoCAD (or AutoCAD LT) drawing content from any web browser or mobile device using a supported web browser (such as Google Chrome or Safari) or mobile device (such as an iPhone, iPad, Android, or Windows Phone). According to Autodesk, AutoCAD LT provides access to AutoCAD content with: up to 2 GB of content storage 24/7 access to content, with no limit on concurrent sessions access to on-premises, private or cloud-based AutoCAD databases Autodesk's cloud-based service is free and allows users to access their drawings and data from any device with a supported web browser. Business-class or higher tier versions, which are not included in the free service, are also available. Autodesk has not released information on pricing or subscription terms for the AutoCAD LT business-class or higher versions. The AutoCAD LT app has been available since 2010, and is no longer supported on devices running Windows 8 or newer. AutoCAD LT is an app from Autodesk, and not to be confused with Autodesk's AutoCAD software. Autodesk recently updated the AutoCAD LT 2017 web app to the current 2018 version. You can find the new version of AutoCAD LT on the Autodesk Marketplace page. The updated version of AutoCAD LT is also available as a mobile app, and is compatible with

The product is compatible with Windows 7, Windows 8, Windows 8.1, Windows 10 and macOS. AutoCAD LT is a low-cost CAD/CAM software for use on Windows, Mac, iOS, and Android. It is part of a family of "Autocad" products that work with CAD drawings. It is an enhanced version of AutoCAD 2009, but is compatible with the Windows Vista operating system and later. AutoCAD LT is similar to AutoCAD Architecture, however, it lacks the "Architecture" and "Electrical" packages. It includes features such as creating 3D model lines and surfaces, importing and exporting to DWG and DXF, and RTF text files. AutoCAD 2012 is the successor to AutoCAD 2010 and AutoCAD LT. AutoCAD 2019 is the successor to AutoCAD 2016 and AutoCAD LT. Here is my code. I'm trying to write a simple if statement to select a different script. I need to select either the pre-calc1.py file or the pre-calc2.py file. myfile = sys.argv[1] if (myfile == "pre-calc1.py"): print("In pre-calc1.py") else: print("In pre-calc2.py") So, I tried the following. But I don't know why this doesn't work. myfile = sys.argv[1] if (myfile == "pre-calc1.py"): print("In pre-calc1.py") else: print("In pre-calc2.py") I get the following error message.
