Open Autodesk's Autocad's program in "Program Files" folder. Double-click " autocad.exe " to run the program. Click "File" button and choose "Import Model" and drag and drop your.dwg or.dxf file into "Import Model" window. The.dwg file or.dxf file will be imported successfully. Double click "MODEL.DWG" or "MODEL.DXL" on Autocad's Program Window to open. On the program's main window, click "File" menu and choose "Save a Copy" to save it. Close Autocad's program and double click "MODEL.DWG" or "MODEL.DXL" to open it. Open the exported file. Save the file as a.DWG (x,y,z) file or.DXL file. Autocad Autodesk Edition's file format To use Autodesk Autocad in the Autodesk Autocad Edition (Autocad's service program) Install Autodesk Autocad and activate it. Open Autodesk's Autocad's program in "Program Files" folder. Double-click " autocad.exe " to run the program. Choose "Edit" or "Preferences". Choose "View" and select "Convert DWG To DXF" or "Convert DFX To DXF". The.dwg file or.dxf file will be converted successfully. Double click "MODEL.DXF" to open it. Close Autodesk's Autocad's program and double click "MODEL.DXF" to open it. Open the exported file. Save the file as a.DXF (x,y,z) file. Creating the models Creating your models can be done by hand with a ruler and measuring tape, or with an AutoCAD software. If you're designing for AutoCAD software, you'll first have to open a drawing in a viewing window. Some of the steps that follow use the.dwg format to represent the drawings. If you are designing for hand drawing, then follow these steps: If you want to change the resolution to be about 50-100 px per cm (1/2 inch per 1/100 inch), follow these steps:
