GotCLIP Downloader Crack+

GotCLIP Downloader is a lightweight software application designed with an overall simplicity in mind for helping you download videos from some popular online video-sharing websites, such as Dailymotion or MySpace. Minimalistic design You are welcomed by a clean feature lineup where most of the operations can be carried out with minimal effort. It doesn't offer support for clipboard monitoring options, so you have to manually paste a valid URL in the primary panel. Basic functionality GotCLIP Downloader gives you the possibility to download videos even if they are located on personal pages, such as blogs, communities, or other pages. What's more, the tool is able to fetch multiple clips found on a specified page if there is more than one video available. Other notable characteristics worth mentioning enable you to automatically select and download the best video quality from the available options, as well as resume or pause the downloading process at any time. The utility also offers support for automatic resuming mode when the Internet connection is lost. Since it doesn't require much computer knowledge to set up the dedicated parameters, even rookies can master the entire process with minimum effort. Bottom line To sum things up, GotCLIP Downloader seems to be the right choice in case you are looking for a simple-to-use application that comes packed with limited features for helping you grab videos. It cannot compete with other powerful programs, as it lacks support for different output formats, hotkeys, and scheduled tasks, just to name a few suggestions.
