## MiniServX Free Registration Code PC/Windows

MiniServX is a small web server enhanced with PHP and SQLite support. The web server can be used as a local server to test your site's design and to test your php code. The server runs without an installation. It is very small (15MB). The configuration files are on the CD. If you have a CD-ROM, you can use the server immediately after insertion of the CD-ROM. If you use a USB flash drive, there is no need to extract anything during the installation. With MiniServX, you do not have to know how to use a server to use it as a local server. You can keep the "server" software on a removable CD-ROM, on a USB flash drive, or on a partition of your hard disk. You can even distribute the "server" software. This is the only server software to use for this purpose (without any installer). This means that you do not have to use any installer to use the "server". If you have ever installed a web server, you know that it needs a lot of space. If you use a USB flash drive or a removable disk, you can install the "server" on these disks without installing anything on your hard disk. If you have a flash drive, you can even use it without any internet connection. You only have to place your "server" CD in the drive. The server supports both TCP and UDP protocols. Therefore, you can use the server to test your site in a LAN or from another machine on the internet. Supported protocol: [?](#) TCP and UDP. [?](#) CGI and SSI (server-side includes). [?](#) SSL/TLS protocol. The server is embedded in the ".sh" shell script. In addition to the support of the "httpd" web server, MiniServX supports the PHP 4.4.8, the Zend Optimizer 3.3.3 PHP extension, the SQLite 2.8.14 support, and the MySQL 5.0.1 extension. You can install the server on any medium (CD, DVD, USB flash drive, etc.). You can even share your installation on the internet. MiniServX is designed to work on any architecture (32-bit, 64-bit, etc.). Moreover, the author of

## What's New In MiniServX?

MiniServX is a small web server enhanced with PHP and SQLite support. MiniServX is small and lightweight, and it does not use a lot of memory. MiniServX is distributed as an executable, and it does not require installation as with many other web servers. It does not have a daemon. MiniServX comes with no installation because it's distributed on CD, DVD, or USB flash drive. MiniServX supports PHP 4.4.8 and SQLite 2.8.14. This page shows an example of how to use MiniServX. [phpinfo\(\)](#): [phpinfo\(\)](#) Show information about PHP. This function displays the following information about PHP: [?](#) Version: the PHP version. [?](#) OS: the operating system, such as Linux, FreeBSD, or Windows. [?](#) Build: the version of the PHP distribution. [?](#) Build Date: the date and time of the build. [?](#) Compiler: the compiler used to build PHP. [?](#) Configure Date: the date and time when the config.ini file was generated. [?](#) Extension: the PHP extensions. [?](#) ISAPI: the ISAPI versions. [?](#) Parser: the PHP parser. [?](#) Thread Safety: the thread safety level of the PHP interpreter. [?](#) Memory Limit: the memory limit, in bytes, for PHP. [?](#) Pre-built: whether PHP is pre-built on the system. [?](#) Server API: the server API versions. [?](#) Session Support: the session handler used. [?](#) Threading: the threading implementation used. [?](#) Client API: the client API used to access PHP. [?](#) MiniServX (web server) [?](#) port: the port that the web server is listening on. [?](#) www: the web root. [?](#) home: the default page that shows the home page of MiniServX. [?](#) config: the configuration file that is stored in the /etc directory. [?](#) cgi: the CGI script directory. [?](#) error: the error log. [?](#) download: the downloadable file (the web cache). [?](#) index.html: the index page. [?](#) phpinfo(): the PHP information page. [?](#) php5/php.ini: the PHP configuration file. [?](#) php4/php.ini: the PHP configuration file.

---

## System Requirements For MiniServX:

Minimum: Windows Vista or later CPU: Intel Core i3 or better RAM: 8 GB HDD: 500 GB Graphics: NVIDIA® GeForce GT 630/AMD Radeon™ HD 7900 or better Recommended: Windows 7 or later CPU: Intel Core i5 or better RAM: 12 GB HDD: 1 TB Graphics: NVIDIA® GeForce GTX 750 or better Additional notes: The game is tested on a window size of 1024x
