A: There is only one way to obtain a user's pagetoken (which tells Facebook when you access the user's data, to allow the access token to be cached for a period of time). You must send a HTTP POST request to Notice that you cannot send a GET request, which would normally query an arbitrary user's "published\_posts". Your user will be able to see the "published\_posts" but not the requester of their "published\_posts" The same limitation exists for friends feeds. In this case, though, you must use an HTTP POST request to a URL such as 3da54e8ca3
