PDF | p> Investing in the stock market is closely related to the risk of price movements. Investors used technical analysis to minimize the risk involved. But that was before fundamental analysis was developed. Not so long ago, the first fundamental institution for the development and promotion of technical analysis was created in the UK. In the late 1980s, after the adoption of a legislative act regulating the trading of financial instruments, the market for financial instruments became available to a wide range of investors. Many of them realized for the first time that the financial market is not just a market for financial instruments.
