Endless Complaints, US-Korea Relations Are
Steady CHANGHON, Korea, April 26
(Yonhap) -- South Korea is confident that its
strained relations with its U.S. ally will not

worsen as a long-standing dispute on deploying the Terminal High-Altitude Area Defense (THAAD) missile system has subsided, a foreign ministry official said Tuesday. The official expressed the view during a briefing to international media after U.S. President Donald Trump and South Korean President Moon Jae-in met at the White House Monday. Both leaders met in person for the first time after Moon was elected into office in May last year. Asked whether Moon and Trump agreed on the deployment of the THAAD, the official said, "Of course. They agreed that the THAAD is compatible with the alliance and that the THAAD system is necessary. And they

KeyPropolis protects intestinal cells against
indomethacin- and diclofenac-induced damage
in rats and prevents enterotoxin production in
vitro. We tested the potential role of propolis
(bee glue) in protecting the gastrointestinal tract
against damage caused by nonsteroidal anti-
inflammatory drugs (NSAIDs) or bacteria
responsible for causing enterotoxin production.
Rats received 200 mg/kg body weight of
propolis intraperitoneally (ip) or by gavage (po)

every 12 h for 5 days. Different NSAIDs were given by ip injection (100 mg/kg body weight): diclofenac, indomethacin, or mefenamic acid. Diclofenac produced leakage of the blood-brain barrier, decreased plasma blood glucose, and decreased serum albumin. Propolis prevented these effects. Rimonabant (4 mg/kg body weight), but not naloxone, potentiated these effects. Indomethacin produced more prostaglandin synthesis and increased mucosal damage. Administration of propolis and co-administration of propolis and diclofenac or naloxone prevented the increase in prostaglandins and also prevented any damage. Enterotoxins (STa or STb) were not found in cell culture supernatants from *Escherichia coli* cultures treated with diclofenac or

indomethacin. However, propolis and naloxone, with or without NSAIDs, prevented STa or STb production from E. coli cultures. Our results demonstrate that propolis prevents NSAID-induced gastrointestinal damage and that this protection is related to prevention of the prostaglandin cascade. Propolis also prevents bacterial enterotoxin synthesis. These results suggest that propolis might be useful in preventing NSAID- and microbial-associated gastrointestinal damage. Rokitno Rokitno is a village and municipality (obec) in Most District in the Ústí nad Labem Region of the
