Key features: Support for inventory inventory control and shipping Users management and user location setup Stock management Add, update and delete inventories Scan or Import barcodes Stock movements and check-in/check-out process Import a CSV Export a CSV Users and locations management Audit and history reporting Mobile app What's new in Version 2.0.12: 1. Added the ability to print a list of users 2. Users can now be closed, updated, and moved by click 3. Users can now be deleted 4. Inventory summary report is now more detailed 5. Added the ability to export a CSV file 6. Added the ability to print barcodes from CSV 7. Added the ability to copy barcodes from the list 8. Fixed a bug with scanning barcodes 9. Fixed a bug with the option to show user icons on the top-left cornerQ: Using an object as a key in an object in JavaScript Why can't I use a Object as a key in an Object? var test = { a : 10, b : 20, c : 30, key : { a : 20 } } However, this does work. var test = { a : 10, b : 20, c : 30, key : { a : 20 } } test.key.a = 20 test.key.b = 20 test.key.c = 20 A: Your second example is perfectly valid. In the first one, you're defining a key named key, which isn't used anywhere else. To create an object literal with a property and a default value, use the syntax: {property: value} Our founding members are the world's most trusted and experienced marketers. The founders at Blind Group have more than a decade of experience in digital marketing. Our experience in digital marketing has allowed us to focus on what is important for us to solve the problems we are dealing with. What's New in the?

You know, that box of 4 1/2x3 1/2-inch cards with the sticky note on them, and the ones who hold "change for the better". You also know that one of those paper/card combination is worth a lot to you and your business, and that the average person couldn't give a **** about it or why you store it in such a unique way. Well, we are here to tell you that we care. The box of 4 1/2x3 1/2-inch cards with the sticky note on them, and the ones who hold "change for the better". You also know that one of those paper/card combination is worth a lot to you and your business, and that the average person couldn't give a **** about it or why you store it in such a unique way. Well, we are here to tell you that we care. We believe that the people around us care. They want to contribute more than just the daily carpool and the weekly Friday night beer. They want to contribute to their community and the world. We want to show them what they can do. We want to give them a simple and flexible way to make a difference and move their organization forward. So, we built Inventoria, a simple and flexible product that makes you and your team more productive, effective, and organized. Inventoria Inventory Software Features: *** Simple and Manageable UI*** Let's be honest. Every day, we end up with lots of unstructured data. That's not good, that's not helpful. So, what makes a person want to open an inventory management software? It has to be simple and easy to use. What makes Inventoria stand out? It is absolutely easy to use. We think that a typical person should be able to use a software in minutes. The Inventoria UI is just perfect. There is no need for a wide array of pages, menus, and buttons. Everything that a user needs is right in front of him or her. So, if you are someone who doesn't want to wait for days to get to know how your inventory works, or if you are not that "computer" person, then Inventoria Inventory Software is the right choice for you. *** Flexible but Concrete*** Do you have some kind of item management software already, but you have the urge to make it different? That's ok. We respect your business, but we do not intend to change your business. That's why we offer a one-time purchase to give you the freedom to change whatever you want to. We understand that some of your team wants to make changes

System Requirements:

Minimum system specifications: OS: Win 7, 8, 8.1, 10 CPU: Dual Core Memory: 8 GB RAM Graphics: NVIDIA GeForce GT 330 / AMD Radeon HD 5750 / Intel HD Graphics 4000 or better DirectX: Version 11 Network Adapter: Broadband Internet connection Recommended system specifications: CPU: Quad Core Memory: 16 GB RAM Graphics: NVIDIA GeForce GTX 560 or AMD Radeon HD 6850 or better
