The Vectric Aspire V3.09 PhotoVCarve Cut2D Cut3D Vcarve Pro 1.8.0.1 is a photography utility that allows you to easily turn your photos into 3D images, (as well as 2D, photo collages, panoramic images), using different 3D objects available for free from other 3D software..Abstract We describe a novel technique for obtaining a three dimensional (3D) model of a polydiacetylene (PDA) surface for use in studying biomolecular interactions and biological materials. PDA is a light diffraction grating, which exhibits a periodic refractive index variation as a function of light wavelength across the band-gap of its conformationally-bistable form. We explored the potential of a 3D-model of a PDA surface as a model system for the study of polymers containing aperiodic structures for analyzing the effect of aperiodic structures on biological molecules. A PDA-isotropic non-polymeric cell extract was prepared to be a useful model system for investigating the polymers-biological molecules interaction. The PDA-isocell extract was characterized by using light scattering 0cc13bf012
