## **What's new in Age Of Fear: Pirates! Expansion:**

**BLOG Monday, March 23, 2010 The FBI files on Anton LaVey will come as no surprise to those familiar with LaVey's background on his own warped form of Satanism. LaVey was a known child murderer working as a Satanist even as a younger man. See below for a sample clip. This article from the 2009 edition of the UFO Midwest is an overview on LaVey and a good introduction to his work on Satanism. Anton LaVey, notorious devil worshipper, tells true stories of murders committed by Satanists just like himself. By Meagan Burch, Director of Operations, UFO Midwest**

**In my secret life, I lost about 1,000 LBM. In my public life, I have accomplished enough to make up for it. Some of my greatest accomplishments as a writer have been the articles I've been privileged to pen. That privilege came about as a result of a rather unpleasant phone call one sweltering Louisiana summer night. It was a Friday, hot as hell, and I was enjoying a cool drink outside in the backyard, wondering if a movie might be playing at the local drive-in. Suddenly, someone started banging frantically on the door. To say I was startled was an understatement. I rushed inside to discover a raving, pale man trying to get me to accept the fact that I'd been visited by my Satanic god. "Wait," I said, trying to make sense of the unbelievable. "You're not Anton LaVey, are you?" He grabbed my shoulders. "Anton LaVey" he hissed in my face. "I'm Anton LaVey, you goddamn fool!" He was right, of course; after all, he'd penned the infamous "Satanic Bible," had been heralded in the tabloids as Satan's Sex Maniac, and they knew him as the founder and performer of Satan's Church, the Church of Satan. Of course, the sun went up in the sky that day and Satan's advocate returned to his astral plane. I'm not saying that this is the only reason for LaVey's undeniably bizarre behavior on that phone call. However, the doctor who administered my medication owes a lot of money. Since then, the**

A brand new story about Chinbu's Adventure is now available! We've chosen to take you to a world covered with ice and snow! Avoid critical fire sources and deal maximum damage with the "Chinbu Action" skill. Continue this Chinbu adventure to get maximum damage! Gameplay: Movement: In addition to regular walking, you can also run while moving. In melee combat, your character will not move while attacking. But when you switch from melee to ranged attack, your character will move. As you gain levels, you can keep running while moving. When you escape the melee range, you can stop moving while attacking. When you switch from melee to melee, your character will move. Ranged attack: While moving, you can still place a ranged attack. If you do this, your character will move. Ranged attack: A so-called "targeting range" is the distance from your character to the enemy. A "target" is the enemy within that targeting range. When you set the range for a ranged attack, you can focus more on the enemy. When you enter melee range, you can only focus on the enemy. Chinbu's Action: Chinbu's Action: Chinbu's Action is a special attack that can only be used when attacking an enemy. Press LT to use it! Other characters can support you in using your action. When you use a group support action, you must use all of the characters who are supporting you. A different attack pattern is needed to use support actions. This will be applied when the action is used. Supported actions can only be used once during combat. For example, if you use Support Action A and Support Action B, Chinbu will only be able to use one of these actions when attacking. When you use this, damage will be dealt even if your character gets hit. Support Action A: Support Action A is a special attack that takes just 1 AP to use. This is the fastest support action. You must decide whether to use Support Action A first, or Chinbu's Action. This is because you cannot use both support actions at the same time. There are two ways to use support actions. The first is to decide, based on the situation, which action to use first. The other is to directly control both actions and keep using Support Action A over and
