C++ COM objects and libraries The C++ object layer makes it possible to create C++ objects which can be used with the COM APIs, although AutoCAD Product Key supports only C++ classes created using Visual C++ and MFC. Additionally, new features in AutoCAD LT will not require VBA or Visual LISP to create C++ objects. Newer versions of AutoCAD are generally compiled in Microsoft Visual Studio.NET, but some older versions are compiled with Visual Studio 6. The ObjectARX library is an add-on to AutoCAD which can also be used to create C++ COM objects for automation. Command blocks AutoCAD LT contains three command blocks: AutoCAD LT Blocks are blocks that contain one or more commands, such as Line, Area, or Text. The commands are grouped together into a block. AutoCAD LT Macro blocks are blocks that contain functions to automate drawing actions. AutoCAD LT JavaScript Blocks are blocks of JavaScript commands. These work with the Command Blocks and Macro Blocks, but are not available in AutoCAD LT 2012.
