A left-handed clinker is one who tries to achieve victory through his left hand. When he begins a movement, his left hand will stretch out first in front of the body to move in the right direction, while the right hand will follow. If a left-handed clinker loses this fight, his left hand will end up in the "Hole in the Wall," which is an easy way to win. When a right-handed clinker begins his movement, his right hand will be the first one to stretch out, in which it is good to win. A right-handed clinker is hard to beat. If he loses, his right hand will end up in the "Hole in the Wall."/*
