guides on Digital Photography School Color theory and the color wheel In this short article on Color Theory from Digital Photography School, author Daren Maybaum explains how he used the color wheel to pick a color and how to adjust the color wheel colors for more precise color matching. He also shows some of the different properties of colors for more specific information. Tools – tutorials In this short tutorial from GraphicBeast, author Cloudstate, you will learn how to make a bevel on an object. This is a useful tool for making 3D effects on Photoshop.

---

After learning how to do it, you can share your work with others and your friends. In this Photoshop tutorial from GraphicBeast, author Cloudstate, you will learn how to make a star using shapes, colors and the color picker. You will learn how to add weight to the stars, give them transparency and make them better looking by adjusting the opacity.

Photo In A Photo – tutorials In this tutorial from Photo In A Photo, you will learn how to create an HDR image in Photoshop. You will learn how to convert an image to a high dynamic range (HDR), add custom

---

tones to the image and use a mask to remove the background from the picture. Advanced techniques – tutorials In this tutorial from Digital Photography School, author Derick Smith shows you how to make a cylinder in Photoshop. This tool is useful for making car models and other 3D-looking pictures. This tutorial also covers how to use the Polygonal Lasso tool to fill an object with a different color. Creating a stylized computer graphics logo in Photoshop – tutorials In this tutorial from GraphicBeast, author Cloudstate, you will learn how to

7 Times Kim Kardashian Got Me Talking About the State of Feminism  
WHY WE CARE: Kim Kardashian is more than just Kim Kardashian. She is the embodiment of the American dream, a perfect specimen of the “selfie,” and so much more. We care about the state of feminism because we care about the state of women. And if you don’t care about the state of feminism, you should, because right now it’s in an unprecedented state of dire straits. We’ve been forced to get creative

---

and intelligent about our plight. We've been forced to fight our way out of the comfort zone and into media, because we're not allowed to be political without getting skewered. And we've been forced to be thinkers and creators and problem solvers in ways that we were never asked to be. Hell, we've been forced to do these things at a cost-free, full-fledge, infinitely accessible level. And now, what we're given are the people who are crying "F you!" and "There's a war on women!" and "Get me out!" Every day I talk to women my age and older who say, "I used to

---

think we had it made,” or “We were just getting by,” or “We’re doing it now.” And these people are my sisters and my mothers and my aunts and my friends. And then I get the next thing on Twitter. And the next thing on YouTube. And the next thing on Instagram. And yeah, maybe it’s only been a day, maybe it’s been a week or a month, but the world is changing and it’s changing in ways we’ve never seen before. It’s changing and getting worse for women because we have been forced to adapt to this culture that’s judging us, that’s made us the butt of jokes

---

and the gatekeepers of political correctness, and the media is doing nothing to help us. So I'm going to keep talking about the state of feminism and how the situation has changed for women in the past twenty-five years and how that has an effect on our lives now and in the future. Because feminism is an ongoing conversation and we can't let our voices die out in

**What's New In?**

**Q: Need help executing a Maven script I have a ant script that pulls in**

---

various files from a directory, merges them, compiles them and then runs an executable. The project has changed recently and I am now using Maven for managing the project. I have a file `scripts/merge_source.xml` that contains a task to merge the files. However the Maven `maven-ant-tasks` seems to ignore it. ... A: It seems that `maven-ant-tasks` is the wrong place for this kind of script. If you want to do it in maven I would suggest the `maven-ant-tasks` plugin (or `antrun`) and your script should be able to be placed in `src/main/resources/scripts`

---

Then you can use an ANT file, such as the script in your question, like this of its violence. John Anthony's *Suffer the Children* had a similar, but still far more violent, conceit, shifting the action entirely away from the lavish production that was the norm and toward an exploration of the brooding, sadistic side to human nature. In the film, a pair of gay biker brothers, played by Simon Dutton and John Phillip Law (who would reunite in *Die, Daddio!*), come across a boy whose father has kidnapped him and taken him to a remote cabin in the woods. Once

---

there, the father explains his intentions as he tortures his son. It wasn't unusual for these sorts of films to feature this kind of extended torture sequence. While many of them depicted sadistic acts against vulnerable children, it was in this film that American cinema perfected the technique. "I'll take the skinny kid and put him in the old well
