**What's new in Fire Opal:**

This specimen of the Fire Opal is approx 4cm in diameter. It is contained within a transparent Lucite capsule. Inside there was a strong smell of sulphur and acid to the experienced jeweller! Remember - we are always more than happy to post your order back to you, just let us know! Please check out more Fire Opals on our site - sometimes it can be a while between orders! Welcome to the Fire Opals web shop! Please browse the site - we have a large collection of fire opals; lapis, jasper, pug nuggets and even coloured particles (i.e. "gem slush"). If you'd like to send us your order, all we require is your email address - we don't want your postal address (sometimes jewellers order more of our stones than they would sell to their customers, by sending them to you, we can help guarantee a sale). If you would prefer not to send us your details, you can always add them to our site membership so you can find us very easily in the future! Most of our products are already listed on a number of other websites on the web, so you can find some gems you may have not yet found on any of our listings - let us know if you have any ideas for ones you'd like us to put up. All of our items have a "Story" attached, and we have been selling online for over a decade - so give us a go and we're sure you will see why Fire Opals is the place you can buy Fire Opals online from!
