News 11.04.2018 Indiegogo Milestones Reached? 11.04.2018 Imagine yourself being able to have a beautiful and fresh waterfall in your back garden. One of the most popular and the most common use of water in our daily life is in our gardens. Perhaps you might also have a garden in which you can see a large number of different plants growing abundantly. They are very important. They are the primary source of nutrients we need. But unfortunately, when we use water we use it to do various things. This is one of the most crucial things about people using our water supply to take their

Rotor Control (SDR*), Rig Control, Power Meter, Logbook and 200+ other features that you might find in a real radio. Manages the radio manually. Connects directly to the radio (cable, Bluetooth, Bluetooth...etc). Uses the ACTEL protocol on the radio to access all the features of the radio. Advanced tool that allows you to control the radio without a computer. * SDR is a software definition radio that enables you to listen to radio waves. Typically, SDR is used on a computer connected to a radio's antenna. SDR has a wide range of features: tuners, waveform displays, audio filters, channel counters, storage, statistics and it has the ability to edit and play back and radio signal. Rotor Control lets you use your mouse to control your radio's direction. ITUNES AND FULL FEEDBACK You like the software? Then share it with your friends (via sharing functions) and let us know what you think. I'd like to thank them for adding an option to automatically pause and resume recordings of "offline" activities. This is a big time-saver when using a portable scanner. With the old software version it was impossible to pause the record remotely, but this version works perfectly with the Azuza4 and a clicking of a button in the application brings up a new window with a list of pauses. Thank you for working on this software, and please keep up the good work! Thank you so much! Last time I tried this beta version was May 4th. The performance on my laptop was not good at all. It was still around 75% when I upgraded to the newest version. I am pleased to report that it has been fixed. Well done! Great idea, unfortunately this kind of program is only for radios which run windows 7 or vista. I use Linux based OS and I have to re-install the app every time I upgrade the system, which happens a lot. The app freezes for some time everytime I upgrade the system, and I have to restart it. I am really struggling to find an app which has all of these features, and it is very difficult to find an app which has a stable version to run on my system. I would be extremely pleased if you could fix
