
Minnetonka Surcode Dolby Digital Encoder

Minnetonka Surcode 3.0 for Dolby Digital Encoding

To perform the SurCode encoding:

- Turn on the SurCode encoder.
- Open an audio file or a script that contains audio and surround sound tracks to be encoded. If your movie has a stereophonic soundtrack and SurCode is not enabled, you may have to choose a Surcode format other than 5.1 or Dolby Digital.
- Choose a surround sound format or format for encoding stereo files.
- Choose a checkbox for each surround channel to be encoded. All surround channels must be checked for each file to be encoded.
- Choose a standard format.

To perform the Surcode encoding:

- Turn on the SurCode encoder.
- Open an audio file or a script that contains audio and surround sound tracks to be encoded. If your movie has a stereo soundtrack and SurCode is not enabled, you may have to choose a Surcode format other than 5.1 or Dolby Digital.
- Choose a surround sound format or format for encoding stereo files.
- Choose a stereo surround sound format.

Note: SurCode encodes both stereo and surround sound tracks in the same script. For your convenience, the SurCode encoder offers you the option to have the stereo soundtrack encoded as it is found in the script.

Limitations for the Surcode encoder: Surcode encoding has the following limitations:

- You can not encode up to six channels
- Sound effects from up to four Surcode channels are muted
- Surround channelization can not be more than 60 percent
- Scoring time must be no more than 2.5 seconds for each section
- You can not add any editorial comments or a title to the end of the movie Source Notes:

A: Check this e79caf774b

Minnetonka Surcode encodes 5.1 Surround Sound or stereo files. The SurCode encoder is available at only one price. Note that the SurCode software is a valuable tool if you also need to edit the Surround file for example for DVD telecine work where the Surround audio is a . Exploring the Project Editor. After you have double-clicked a dialog file in the Project Editor, you can open it in the Project Editor. 4. Choose Create in the File menu to open the Project Editor. This will bring up the Project Editor display window. On the Project Editor toolbar, the buttons are different depending on your project type. Click on the button you want to perform the task. 5. The Project Editor contains some convenient features. To move a dialogue file to another location, do one of the following:

- Right Click > Move
- Option + Right Click > Move
- CTRL + Click > Move

6. The Project Editor also contains an area that can display a thumbnail of each of the dialog files in the project. To display the dialog file thumbnail, do one of the following:

- Option + CTRL + Click > Thumbnail
- CTRL + Click > Details
- Option + CTRL + Click > List

7. The Project Editor toolbar contains buttons for adding new dialog files to the project, for renaming dialog files, for creating and modifying dialog files, for customizing dialog file format, and for finding script files. You can also view a list of all script files in the project. Click on the button you want to perform the task. To select multiple dialog files and move them to different places, do one of the following:

- Option + CTRL + Click > Move Multiple
- Option + Shift + Click > Move Multiple

8. The Project Editor toolbar contains buttons for adding new dialog files to the project, for renaming dialog files, for

creating and modifying dialog files, for customizing dialog
