Is an application that makes it very easy for you to control the orientation of your monitor. This software is very easy to use and gives you access to all the features of the program in the System tray (of any operating system). You just need to install and run it and you will be able to change the monitor orientation. In addition, you can view its options in the system tray. You can also enable keyboard shortcuts to change the orientation in a snap. If you want to show a splash screen, enable an automatic rotation or show a small, medium or big button on the taskbar, you just need to configure it in the Options windows. This software is a set of useful tools that you can customize to your needs. Moreover, you can remember your last configuration options by saving them in a workspace. What's New: Pivot Pro versions 1.7.7.3 and 1.7.7.4 have been released. The program supports the following operating systems: Windows 95/98/ME/XP/7 and 64-bits. The program requires a very low amount of system resource and didn't freeze, crash or pop up errors during our tests. Pivot Pro is a simplistic application that you can use to change the orientation of your display. Once you install the program, you will be able to access its features in the system tray. So, you can rotate the display to 0, 90, 180 or 270 degrees, with the simple click of a button. But you can also go to the "Options" window to enable and configure keyboard shortcuts for these commands. We recommend you do this since it's a lot easier than having to run around the display with your mouse to find the button while tilting your head. In addition, you can enable Pivot Pro to show a splash screen on startup, as well as to display a small, medium or large button that will rotate your display by 90 degrees in a clockwise direction, every time you click it (optionally set it to always be on top of other applications). Last but not least, you can save, delete or use a workspace. This is a feature of Pivot Pro that memorizes the current resolution, color depth, refresh rate, screen orientation and desktop icon placement. The program requires a very low amount of system resource and didn't freeze, crash or pop up errors during our tests. It also includes a user manual that explains all of its features. Version 1.00 Details: [ New features, fixes and improvements. ] - Splash screen can be enabled by double-clicking on the Pivot Pro icon. - Sliders now have corresponding buttons. - Added an options window that enables you to select window height, width, icon size and color. - Added a button that will rotate the display by 90 degrees in a clockwise direction, every time you click it (optionally you can set it to be always on top of other applications). - Added an option for saving, deleting or using a workspace. This option is accessible in the "Options" window. - Ensured that the program will correctly display the correct operating system, depending on the version of Windows, since this always changes every day. Pivot Pro Features: - Small, medium or large buttons that will rotate your display by 90 degrees in a clockwise direction, every time you click on them (optionally you can set it to be always on top of other applications). - A splash screen that appears on startup, displaying a small, medium or large button that will rotate your display by 90 degrees in a clockwise direction, every time you click on 3a67dffeec

Pivot is a customizable clock of sorts. You can enable it to display the time in 12 or 24 hours format, the date in the month, day, year or century format. And you can activate the ability to display the date in a special way, at the same time as the hour and minute, by selecting whether you want to display: * the normal date at the top of the screen, or * a date in the top center of the screen, * a special date in the top center of the screen, * an "isochron" date, or * the date if you enable the "isochron" feature. This clock uses less system resources than other non-customizable clocks, and we recommend using the default system time. Pivot Description: Pivot is a customizable clock of sorts.
