4 - Pre-order Now! Join me on the dark side of the force, as I launch a seductive new wave of tasty evil distractions

for Star Wars: The Old Republic! Tell us a little bit about the experience you want to offer players: “These new, action-focused modules add tons of variety to the standard F3P adventure and help offer players the opportunity to enjoy multiple playthroughs and get a few more 'WTF' moments along the way. Whether exploring Fort Voss or chasing down some Renegade scoundrels, there's no shortage of mischief you can get up to in the Cortex. Have a look!” Tell us a little bit about what the difference is between the basic and enhanced version: “As we've done for past modules, we're providing pre-order options for players who want to get just the modules they require. The standard two-player module comes with a new 'Node Tech' item (similar to the Skilltree, and also leading into a tech level 2 training node) which grants a small amount of extra experience when used. The four-player module, however, grants gear that has been specifically optimised for four-player raids. As such, it also offers even greater rewards for the group, as the gear is able to provide additional experience across multiple character levels.” How do we get the extra information? “The standard two-player module is called 'Eyes Only Upgrade Pack 4'. The four-player packs are called 'Eyes Only Upgrade Pack 4 - Enhanced', and 'I Am Your TARGET.' Each pack contains a week-long event in the Cortex to complement the 'Eyes Only' experience. Eyes Only Upgrade Pack 4 contains four new four-player daily story missions - and the current reports are that they're a blast! I can only assume the blindfolded, disoriented mission actor is playing a role in anticipation of the packs releasing, but my mission logs are blank, which could be an omen...” Who is it for, and what would you like to accomplish? “After two debuting with the Knights of the Eternal Throne, Torgal, and Grok'Trol, I think we're now wide open to take a look at other agents with a slightly different skill set and background. Our fan favourite Forge agents clearly seem to be either set up to spy
