Japanese folktale kitsune are cute fox-women who are very fond of sweets. Now, four decades after their appearance, they are facing an existential crisis as they find that they are not able to bear children. Their very existence hangs by a thread. Luckily, they have the power to transform into foxesses and access some untapped magic. But the yokai of Japan have developed formidable techniques for tracking them down. The opposing Samurai clan has tracked the kitsune down and locked up the kitsune, turning them into massive, destructive beasts. The Kitsune Tails joins the adventure as a completely new character who has been held in captivity for decades. She is the only kitsune to hold power and have the power to break the spell. But her magic only allows her to summon kitsune once. She must track down the kitsune by herself and rescue them. A sequel to the critically acclaimed Super Bernie World, the fresh take on the kitsune story is sure to be a new adventure in the longest running shmup series, with brand new worlds, characters, enemies, and powerups to discover. ===== Contains the following content: Super Bernie World Part2 - Kitsune Zero 1. Boss Rush Mode - One-on-one vs Bosses 2. Hidden Characters - 5 more kitsune (all playable in Kitsune Tails) 3. Fantastic Mushroom Area - 8 more levels and powerups 4. Fluidity - Improved fluidity and skippable frames 5. More Chapters - 12 Bonus Chapters in five different worlds. Kitsune Tails - Fast-paced action game with the spirit of Super Bernie World 6. Boss Rush Mode - One-on-one vs Bosses 7. Boss Rush Mode - One-on-one vs Bosses 8. Fluidity - Improved fluidity and skippable frames 9. More Chapters - 12 Bonus Chapters in five different worlds. 10. Four downloadable content packs, 1 per month ===== My original work was 99% the same as Super Bernie World, except that I added four chapters of bonus worlds, three of which were not available in Super Bernie World (the fourth bonus world was not available for free). I gave all the other stuff around 30% the same, just made a little more effort in making Super Bernie World more enjoyable and polished. Kitsune Tails is a complete copy of Super Bernie World, with all existing content, except those added by myself

**What's new:**

I first heard of Valentine De Pastré through an interview with *The Atlantic* about his adventure through North America a few years ago. A keen and curious listener himself, the writer and adventurer had questions about the 19th-century photographer and his motives for embarking on this topographical odyssey of 800 miles across the north border into British Columbia. De Pastré spoke of the radicalism of his family, despite his mother having also been a highly respected and successful photographer, and that his father had deep-rooted concerns about his education and his future. This thread led me into the out-of-print blog of a 19th-century naturalist. By the opening lines of the first post I stumbled across, I found myself unable to tear my eyes from the images. This was something wonderful about this photobook: the photographs - whether charming and quirky or stark and serious - are a manifestation of the artist's imagination. They draw you into the natural world on a whim, through the luminous eyes of an intrepid soul. I'm pleased to see that this blog continues its adventurous vein to this day, and that Valentine De Pastré is still actively posting his pictures here. In fact, I suggest you follow his unusual exploits at *Trait d'Union*, or you could read this interview again with a more modern eye, even as I read on... *The Canon of Photography* has been added to De Pastré's gallery, enjoy! *Love To Learn Only What I Fear To Teach: An Interview With Valentine De Pastré* Image of Valentine, 19th-century photographer. Valentine De Pastré has a long and distinguished career as an artist. As the photographer of Québec, a city renowned as a center for the arts, De Pastré repeatedly returned to his city to photograph life and the workings of the citizenry. But his work as a 19th-century naturalist far surpasses his history in that regard, which may be reason enough for most readers to be interested in his account of his journey across North America and back again. It's a distance that's especially daunting, and unspanned by any trail; De Pastré had to trek for nearly 800 miles from Parramatta to the latitude of Queen Charlotte Sound, and then on into British Columbia. For his jaunt, De Pastré - who had been turned away by ship a few times during his journey to North America -
