Verisoft Access Manager is free and comes in.The invention relates to a cathode-ray tube having a U-shaped electron gun, the electron gun having a common control electrode and a first and a second electrode, the first electrode having apertures serving as slots or holes for passage of the electron beams in the horizontal plane and extending radially with respect to the axis of symmetry of the electron gun, and the second electrode being provided with apertures serving as slots or holes for passage of the electron beams in the vertical plane and extending radially with respect to the axis of symmetry of the electron gun, and to a process for producing a cathode-ray tube of this kind. Such a cathode-ray tube is known from the European published specification 0 347 709. This cathode-ray tube is suitable for an intermediate-resolution cathode-ray tube. It has a U-shaped electron gun in which the cathode is connected to a first electrode which is of conical configuration in cross section and of cylindrical configuration in its axial direction. The first electrode has a centrally disposed apertures serving as slots or holes for passage of the electron beams in the horizontal plane and extending radially with respect to the axis of symmetry of the electron gun. The first electrode also has apertures serving as slots or holes for passage of the electron beams in the vertical plane. The electron beams pass through the apertures of the first electrode in a direction perpendicular to the plane of the first electrode and are then deflected in the horizontal plane. The electron beams then pass through apertures in the second electrode, which can be of conical configuration in cross section and of cylindrical configuration in its axial direction. The apertures of
