## System Requirements:

Your computer must have a DirectX 8 compatible video card and sound card. If you don't have either of these you can use Windows 98/Me to play. During gameplay, some of the 3D features may not work. So, your computer should have a DX8 compatible video card. If your computer has a DX7 card then most of the 3D effects will work fine. If you play on a monitor with a refresh rate of 85 or lower then you may not see some of the 3D effects (for example, any lighting effects you see will be reduced).
