What's new in Elden Ring:

(please wait...) **Wed, 26 Nov 2014 00:21:26 +0000GET AUTUMN WINDOWS | Driver Injection Patch by CANONINOSAAGBy: Sosak1>Last week was SEGA's three-year anniversary. And in the same week, the impatient support team pushed out a new driver injection update. Through the following video-blog, I'll show you how to learn more about this driver...**

If you're not a long-time reader of this blog, you might be new to SEGA's driver injection patch that we at [AppBlog.Net] released last April.

Here's a quick reminder:

It brings recompiled code at the SEGA architecture level to use supported Windows versions of video drivers more effectively. This means the one piece of software is optimized to run fine on a high-end computer. If the user version of the driver has been updated, then that driver is changed to use the SEGA architecture to work properly.   Additionally the driver injection patch works better than ever, because it is designed to avoid rooting out old non-upgraded drivers, helping to keep 30% less drivers later.

If you are new to driver injection, here are a few tips to change your mind for using driver injection. Getting past these tips is just a few clicks away. You'll be able to enjoy the game smoothly.

1) When you install the patch, its download is over 39meg. I recommend a strong connection for download it.

2) Before installing the "Autumn Wind" driver injection patch, you need to reset Windows 7 to a special secure mode. Time to download the special WIndows 7 reset
