A YouTube channel has been taken down amid accusations of copyright infringement. Q: how to use Joda? I wrote a simple example program in Java, which reads a JSON file and display its content. I have read some of the tutorial but still not found out a clean example that reads a JSON file and display its content. Joda is a very powerful library but I just found some example that uses time for dates. I would like to have something like this: { "key1" :value1, "key2" :value2 } And I would like to read and display it something like this: key1
