Features Key:

- New to FIFA, Hyper-Motion Technology uses 22 suits fitted with motion capture sensors worn by real-life players, to account for the complexity and speed of the game and create lifelike movement that can't be achieved by using in-game animations. Until now, the only way to do this was to build individual animations from scratch, which would have pushed the team to create the game's 200 current-gen animations. With FMXT, we've used the thousands of recorded frames of data we have from the integration of the external sensor suits with the system to create the motions, which have been carefully tuned to the human body to provide accurate and realistic movement.
- *Champions* [] - Become just the latest edition of football's greatest club, complete with your very own football club to represent. Create the champions of champions with a full set of strengths, points, kit, owner and stadium. Then take the team to the championship of the world as the No 1 in the world. Or start at the absolute bottom of the ladder to climb the league tables and win trophies as you take your club through the whole game. FIFA Ultimate Team.
