Accessibility AutoCAD's accessibility features include screen-readers, people with blindness, and people with low vision. Accessibility in AutoCAD and AutoCAD LT is controlled by the Accessibility module of the Accessibility palette (right-click context menu). It is possible to enable or disable accessibility features on a drawing-by-drawing basis. The Accessibility palette is accessible through Tools > Accessibility in the right click menu. Accessibility features include: Automatic Accessibility Checking (AAC) checks drawings for potential accessibility issues. Accessibility Document (AD) module allows to edit the Accessibility settings within a drawing, such as: Activate when new drawing opened, or Draw Only when New is checked Quick Access (QA) module provides more accessible options such as: Activate on Selection, activate on double click, deselect on mouseup, deselect on mousedown, deselect on double click Activate on activation of edit boxes Activate on selection of dashed lines, erase, or dashed stroke styles Set of editing modes, such as: Draw Only (activate on drawing start, deselect on mouseup, deselect on mousedown) Draw Only when New is checked Activate on selection of dashed lines, erase, or dashed stroke styles (activate on mouse down, activate on mouse up) Activating a specific tool is conditional Switch between predefined modes such as: Plot Selection Plot Quick Selection Plot Selection (active) Plot Detail Plot Detail (active) Plot Selection (active) Plot Detail (active) Dialog for editing attributes (allows for example to select a text style and set the text style properties) Other features include: Hidden line tool Text on path Property filters Compatibility In May 2018, Autodesk unveiled AutoCAD software for the Mac platform.
