Roblox is an online platform for developing and playing video games. Its main feature is the ability for users to create their own games. This is done by programming and using an easy to learn programming language. The programming language is named Lua and it is used for coding more than 3.5 billion actions on the platform every day. Lua is widely used for game development on computer platforms like the Xbox and the PlayStation, as well as mobile devices. Roblox has over 8 million registered users and over 50 million active users. It is available as a website and as a mobile app that can run on iOS, Android, Windows Phone, Nintendo Switch and a number of smart TVs. Roblox is free to play but has in-game purchases, called Robux, which are used for customizing a player's profile. To make these purchases, players are given Robux by completing in-game goals and tasks, and selling them for real money. Robux is the primary virtual currency of Roblox. It has been described as a gaming Mavado, or a Mavado gift. Roblox was founded in 2004 by David Baszucki and Erik Cassel, and it was launched in 2006. Ever since the pre-sequel add-ons were released, Roblox has been a game that has been compared to Minecraft. The creator of Minecraft, Notch, has stated that he is a fan of Roblox. Roblox was designed as a platform that allowed players to become programmers and create their own experiences. This has been facilitated through the use of a programming language, Lua. The Roblox motto is "Think bigger. Build better", and this is reflected in the creation of games, which are often designed to provide the player with a different experience or expand on the use of new programming techniques and

materials. Roblox's design makes the process of game development relatively straightforward. First-Person Shooter Games Roblox had a time limit, which went into effect in July 2010. This cause many users to be scared away from Roblox, as it reduced the time of players ability to play their games. This was one of the first major changes made to Roblox. The new time limit was that a player had a specific amount of time to play his games. Due to this and other changes, there have been more than four million new users since Roblox 3 started. Roblox is available for Microsoft Windows
