I did some searching online and can't seem to find anything useful. The price has all the info you'd want...is it OK? I normally ride a Peak, but needed a replacement. I'm a 5' 10 male, size 56cm, weight 135. I used this saddle for 4 or 5 months, and then noticed I could barely reach my fingers towards the tail of the rear tree, even with the padded stirrup leathers. The leather extended past the metal tree and into the chamois. I have some other rather heavy saddle/s under consideration, but I want something light. I'm satisfied with the saddle. Never tried it myself but a good friend of mine had it on his bike for a year and said it was stiff but comfortable. Another said it was a bit too soft and took a while to warm up. If you are looking for something different, you might look into the RUB RCPRO that comes in a size medium. It is a bit pricey but I think it comes in the deal of the month and it has a very nice feel to it. If you are looking for something different, you might look into the RUB RCPRO that comes in a size 6d1f23a050
