
NoSQL Booster For MongoDB 4.7.2 Enterprise Edition [CRACKED]

December 20, 2021 - NoSQL Booster for MongoDB 4.7.2 Enterprise Edition. NoSQLBooster for MongoDB (formerly MongoBooster) is a cross-platform, shell-centric GUI. It offers support for SQL and Cassandra as data sources. On Windows, it is available as a web application as a Windows Service (WAS) for MongoDB. This means that it can only be started once as a Windows service, and it can be used in any application, even if it is running Windows on any computer. This provides a greater degree of flexibility and compatibility than with standalone applications. On Linux and *.NET, it is available as a web service.
